Subject: Users of the GreenPlan-IT Site Locator Tool

All,

David asked a good question: Who has adopted the toolset? We had only partial answers, but I did want to follow up with some more concrete information.

As you know, the planning tools are free to download and use. People have taken us up on that. And as you might guess, many consultants appear to have shown enough interest to register for a download. Here is the list of 73 people over the last two years that we began monitoring the downloads, with unknown others before 2017:

Submitted Time	Name	Email
10/31/2018 14:12	Adrienne Smith	asmith@ci.milpitas.ca.gov

Influential consultants Geosyntec, GEI, Paradigm, and Michael Baker are well represented. Cities such as Milpitas (today), Sunnyvale, Santa Cruz, as well as Sonoma and Contra Costa Counties are in the mix. Academics are represented. (The Stanford professor Perrine Hamel is developing a groundwater infiltration model based on Site Locator data and the SWMM model.)

There is a separate list for those interested in the Modeling information.

So there are strong indications of interest if not adoption. But we might never know about the use of the tool in planning. I imagine that the consultants might not attribute their work to GreenPlan-IT's innovations.

I hope that this helps to address your questions, at least in part.

Best,
Tony
